

Set Up Requirements for Nick Warner's Keynote/Workshop

Nick Warner's goal in speaking at your event is to engage with all attendees as much as possible. He is not tech, power point, or sticky notes heavy; but the way that the room is set up is key to optimizing audience engagement and participation. The more fun, the better!

Please have the following equipment available:

- Wireless lavalier (microphone)
- Handheld mic for Nick to be able to walk around the room and open the floor for comments and questions.

SEATING

Please keep the audience as close to the stage as is comfortably possible to keep attendees engaged and able to participate with excitement.

ROOM SET-UP

Please set up the stage in the middle of the longest wall of a rectangular room so that Nick can easily make eye contact with as many people in the audience as possible.

TABLE

Please have a small table or stand available on stage for Nick to place his items on while speaking.

LIGHTS

Please direct as much light to the stage as possible to obtain optimum video recording and photography quality.
